[to be continued]

FEDERATION OF GENEALOGICAL SOCIETIES

Twenty years ago, a small group of individuals envisioned an organization that would serve the genealogical community as a centralized communication vehicle to deal with the issues of project duplication, genealogical consumer "fraud," and threatened or accomplished records closures by governmental agencies. To meet these needs, they formed an umbrella "organization of organizations," the Federation of Genealogical Societies, and embarked on their mission.

Over the years, the Federation has grown in strength of membership as well as in strength of purpose and influence. Evolving as the needs of the genealogical community have changed, the Federation continues to address the concerns of twenty years ago while expanding its focus to deal with today's issues.
