

HOW TO LOCATE AN INDIVIDUAL'S NAME --

In the Family Tree BOOK, and

On the Family Tree CHART.

- Step 1: Find the person's name in the alphabetical INDEX (located at the back of the Family Tree Book).
- Step 2: Be sure you have the correct individual by checking the birth, marriage, and death dates. (In the example, notice that there are 2 "Mary Elizabeth Coverdale" listings, one born in 1890, the other in 1897.)
- Step 3: Following the person's name and dates, you will see the CHART LOCATION (two numbers separated by a slash), followed by one or two FAMILY NUMBERS.
- Step 4: You can now locate the person's name in the BOOK and on the CHART -- see the attached example.

CHART LOCATION

In the example, the "3/217" means Generation 3 and Line Number 217. To find the name on the chart, scan across the top of the chart to the large digit "3", then scan downward to line 217.

FAMILY NUMBERS

These numbers show where the person's name is located in the Family Tree Book. If there is only one Family Number, the person is not married or has no children of his own. If there are two family numbers, the first one shows that person's family, while the second shows the family of his parents.

Note how the Family Numbers are cross-referenced, permitting ease in quickly determining the immediate relatives (parents, cousins, aunts, uncles, grandparents, etc.) without having to go back to the index.
