|                    |                     | ~                                  |

from the LDS records and the GRO microfilm.

The task of putting all the Scottish OPRs on microfilm could best be described as monumental to say the least, and I honestly don't blame the compilers/ transcribers for being human; no one is infallible. What does worry me is that for over thirty years no one noticed this omission, or if they did, made no attempt to rectify it.

Well, that's how I got the missing pages. And what did I find? That one of my great-great-great-grandparents
Thomas Donald and Janet Brown had a daughter called Margaret born on the 19th and baptised on the 26th of July 1819 (see entry displayed below). It didn't really help me all that much after all. I hope the missing records will be of more help to others who read this journal.

A transcription of the missing Galston Birth Register entries is displayed below in a series of 14 tables, one for each photocopied page. At the top of each table are two page numbers. The *italicized* number at the left is the register page number; the [bracketed] number at the right is the number corresponding to the image file I have for that page. Following the transcription is an index to all names in the register — fathers, mothers (maiden name), and children.

Should anyone wish to look at the handwritten version of a record, please feel free to send an email request to me at **blank\_flange@btinternet.com**.

Mention the number of the page you want to see [1-14], and I'll send the photocopy image file to you as an email attachment.

Donald Margaret lawful Daughter of Thomas Donald and Sand. Mouth and Claymin was Moin 19 " Dage 26 Suly 1819

### Galston Birth Register Entries, January 1818 - April 9th 1820

Editor's Note: The records were transcribed by BIFHS-USA president Ivan C. Johnson, who made every effort to transcribe the records accurately; however, as with all transcribed material, there is the possibility of error. Anyone using this information is advised to consult the original. It should also be noted that the minister did not always make the entries in the correct sequence.

| 183      | 1818 [1]                                                                                                                                                    |

# ORANGE COUNTY CALIFORNIA GENEALOGICAL SOCIETY

## OCCGS REFERENCE ONLY

#### **CENSUS 1841**

submitted by Linda Harding
Parish of Jura and Collonsay (part of), District of Islay and Jura, County of Argyll

Enumeration District No. 6 "So much of the Parish of Jura and Collonsay as lies between the Island of Oronsay and Scallasaig in Collonsay (inclusive)."

District No. 6 includes:

61 inhabited houses with 148 males and 197 females, a total of 345 persons with "Total number of distinct Families" given as 62 Enumeration District No. 7 "So much of the Parish of Jura and Collonsay as lies between Scallasaig and Urgaig in the Island of Collonsay."

District No. 7 includes:

108 inhabited houses with 332 males and 302 females, a total of 634 persons with "Total number of distinct Families" given as 109

[Therefore, total houses: 169; males: 480; females: 499; population: 979; families: 171]

"Collonsay June 14th 1841

Sir, Yours of the 1st Ult. did not arrive here until the 6th prior to which I proceeded according to Mr. Muns' orders, and delivered schedules to all the householders in the Island not knowing your wishes - and I thought proper to finish the work upon the days following which I hope you will find correct.

"Collonsay looked over the enumeration schedules and desired me to send them direct to you as in former cases.

"When you are settling with others you'll please remit me for the work. I am with much respect, Sir, your very humble servant Alexr. McNeill, parish schoolmaster" - sent to "J Maclaurin Esq, Sheriff Subt. of Argyle"

Both schedules were certified 10 June 1841 by Daniel McNeill, Enumerator and approved by Alexr. McNeill "person appointed by Sheriff or Provost to divide the Parish" on 14 June 1841, being accepted on 21 June by J Maclaurin, "Sheriff Subt." with "Note: Alexr. McNeill is an Enumerator only and the schedule has not been signed by the Divider. I however consider it to be perfectly accurate."

The schedules for the entire parish of Jura and Colonsay were signed for on 17 June 1841 by "Alexr. Kennedy, Minister of Jura and Collonsay", subject to "Note - the remaining schedules being 6 & 7 and which comprehend the distant island of Collonsay and Oronsay were not attested by the clergyman who lives in the Island of Jura but I have examined them and consider them to be perfectly accurate - Maclaurin, Sheriff Subt. of Argyllshire"

Note: the above information and the census information were transcribed by Kevin Byrne, Colonsay Hotel, Argyll PA61 7YP in September and October 1997; no attempt has been made to change spellings etc. It is thought to be accurate but detailed entries should be checked against the original documents. This transcribed information is intended for private research and is not for publication. The PEI Genealogical Society has obtained permission to publish these records. Information on Colonsay and Oronsay emigration will be welcomed by Kevin Byrne. Email: hotel@premier.co.uk

## Laughter is the best medicine

A young man was travelling at an excessive speed through a small town and was pulled over and arrested by a police officer.

The officer took him to jail and put him in a cell. The officer said, "Consider yourself a lucky man, the Chief is at his daughter's wedding and should come back in a good mood."

The young man replied from the cell, "I doubt it... I'm the groom!"

<u>Young students in the name of Science</u> Actual excerpts from science test papers of young students. Benjamin Franklin produced electricity by rubbing cats backwards.

A magnet is something you find crawling all over a dead cat.

The cuckoo bird does not lay his own eggs.

To collect fumes of sulphur, hold a deacon over a flame in a test tube.

A circle is a line which meets its other end without ending.

Parallel lines never meet, unless you bend one or both of them.

## **Dumb Laws:**

- \* In Alabama, it is illegal for a driver to be blindfolded while operating a vehicle. The same state also stipulates that dominoes may not be played on Sunday.
- \* In Connecticut, the police can stop you for bicycling over 65 miles per hour.
- \* Nebraska state laws stipulate that it is illegal to go whale fishing. (Think about that for a second.)
- \* In Tennessee, another landlocked state, you may not shoot any game from a moving automobile other than whales.

Genealogy: According to the dictionary genealogy is:

- A record/account of the descent of a family, group or person from an ancestor/ancestors; a family tree.
- Direct descent from a progenitor; lineage or pedigree.
- The study or investigation of ancestry and family histories.

To me, however, genealogy is a whole lot more than those three dry sentences. It is finding my roots, my family, and my home. It is seeing my grandparents as a young couple in a census record with their two baby girls; children who I know will be dead within the year. It is seeing my mother as a one-month-old child. It is seeing my great grandfathers signature on Civil War records and knowing that he and others like him must have gone through hell.

It is even finding the skeletons in the closets or the black sheep of the family. It is finding that my family went through some terrible times, but also knowing that they survived.

It is seeing in my minds eye the care worn faces of all of those who went, have gone on before me.

It is listening to old stories told by our elders and passing those precious stories down. It is writing down those stories and facts for our children and their children. It is finding cousins I had not seen or heard from in fifty years. It is finding new cousins and new friends, people who have come to mean so very much to me. It is the realization of how important family is.

It is the realization of how important it is to honor those ancestors who came before us. But most of all, it is the sharing of information with others who like me love the research. It is not just dusty records or words. It is not only sharing the excitement of finding a new ancestor, but also sharing the frustrations of not being able to find what you are looking for. It is the bouncing of ideas back and forth of theories of what might be and commiserating with another when that theory falls through, which it often does.

It is being able to say Look! Look what I have found! and knowing that your excitement will be shared and understood. It is being able ask a question on a mailing list, knowing that what you are asking may be dumb but knowing that you will not be treated with disrespect. It is people who give of their time and their energies to help you. It is people who volunteer their time and energies to do lookups on the various county web pages. It is people who volunteer their time and energies for the various historical and genealogical societies. It is people who give of their time to transcribe old documents and microfilm, and who share that knowledge, whether it is through books sold by historical and genealogical societies or on web pages. It is people who go through old cemeteries and take the time to write down those who are buried there and share that knowledge gladly.

It is people who share old photographs, old letters and their old family stories, not expecting anything back other than a thank you and the knowledge that they have helped another in their family quest.

It is people who go above and beyond what is asked of them because they love genealogy. They love the fun of it, the frustrations of it and the excitement of it. It is also the knowledge that you are passing down something of worth; that you are leaving behind a little something of yourself.

It is knowing that through all of your research you may have made a difference, however small it may be.

That is a little of what genealogy means to me. Author: Unknown
