EDITORIAL

I must report that the new "Clinton County History & Biographical book", is coming along nicely. I am sorry that I can not accept anymore families, except the ones I have asked or know that are still coming in.

While going through 6 boxes in the Archives room at the courthouse, I have found many, many inheritance tax schedules, in the time period of 1920's and some in the 1930's. Write to me as I may be able to assist you in this matter of estates.

There are still many estate papers that I have not find among the file boxes, even though they have been recorded. And I want to point out that some estates have never been recorded, according to the original papers in the file boxes.

To make continuation for 8 generation pedigree chart - take 16 times the page number, minus 14 - gives continuation chart number. For 4 generation pedigree chart - take 8 times the page number, minus 6 - gives continuation chart number.

EXAMPLES: 8 Generation Chart - pg 2 (from 1st chart) times 16 equals 32, minus 14 gives remainder of 18 (for chart #2) etc. For 4 Generation Chart - pg 2 (from 1st chart) times 8 equals 16, minus 6, gives remainder of 10 for chart #2.

I have been asked this question so many times that I thought it would be best if I would mention it here in the Editorial.

I now have a telephone in my office at the local Courthouse, 1-317-659-1981 Ext. 70. Thought you would like to have this phone number if you needed assistance or wanted to ask me a question.
