### HOW THEY LIVED 500 YEARS AGO

Life in the 1500's may have been rather disgusting, but this era may be the source for some of the descriptive modern-day sayings such as:

*"Don't throw the baby out with the bath water"* – Families took their yearly baths in May. Baths equaled a big tub filled with hot water. The man of the house had the privilege of the nice clean water, then all the sons and other men, next the women followed by the children. Last of all, the babies. By then, the water was so dirty you could actually lose someone in it. Hence, the saying, "Don't throw the baby out with the bath water."

*"It's raining cats and dogs"* – Houses had thatched roofs – thick straw, piled high, with no wood underneath. It was the only place for animals to get warm, so all the pets – dogs, cats and other small animals, mice, rats, bugs – lived in the roof. When it rained it became slippery, and sometimes the animals would slip and fall off the roof. Hence the saying, "It's raining cats and dogs."

There was nothing to stop things from falling into the house from the roof. This posed a real problem in the bedroom where bugs and other droppings could really mess up your nice clean bed. So they found if they made beds with big posts and hung a sheet over the top, it addressed that problem. Hence, those beautiful big four-poster beds with canopies.

*"Chew the fat"* – Sometimes our ancestors could obtain pork and would feel really special when that happened. When company came over, they would bring out some bacon and hang it to show it off. It was a sign of wealth and that a man "could really bring home the bacon." They would cut off a little to share with guests and would all sit around and "chew the fat."

*Trench mouth* – Most people didn't have pewter plates but had a trencher – a piece of wood with the middle scooped out like a bowl. Trenchers were never washed, and a lot of times worms got into the wood. After eating off wormy trenchers, they would get "trench mouth."

*Upper Crust* – Bread was divided according to status. Workers got the burnt bottom of the loaf, the family got the middle and guests got the top, or the "upper crust."

*"Saved by the bell"* – England is old and small and they started running out of places to bury people. So they would dig up coffins and would take their bones to a house and reuse the grave. In reopening these coffins, one out of 25 coffins were found to have scratch marks on the inside, and they realized they had been burying people alive. So they thought they would tie a string on the wrist of the corpse and lead the string through the coffin and up through the ground and tie it to the bell. Someone would have to sit out in the graveyard all night to listen for the bell. Hence on the "graveyard shift," they would know that someone was "saved by the bell" or he was a "dead ringer."
