## CUMBERLAND COUNTY, MAINE MARRIAGES 1763-1793

David C. Young and Robert Taylor\*

The following is a compilation of marriages extracted from several sources: Town of Falmouth Marriage Records 1728-1773; Marriages from Cumberland County Commissioners Records 1763-1784 (copied by David C. Young and Robert Taylor); Lincoln County, Maine Marriages performed by Oliver Wood, Esq. (housed at the Maine State Library); and Lincoln County Marriages 1759-1777, from the Lincoln County Commissioner Records (copied in 1935 by Georgiana Lilly and Mabel R. Whiting, Mary Kelton Dummer DAR Chapter, Hallowell, Maine).

Towns included in Cumberland County Marriages are: Bethel (York County), Bridgetown, Brunswick, Buckfield, Cape Elizabeth, Durham, Falmouth, Freeport, Gorham, Gray, Harpswell, New Gloucester, North Yarmouth, Otisfield, Portland, Scarboro, Standish, Sudbury-Canada [Bethel] (York County), Turner, Waterford, and Windham.

The majority of the sources listed above are combined under the acronym CCM (Cumberland County Marriages), and the records below are representative of these sources. ## *Norwegian Ecclesiastical Records*

most ministers did not understand that or would not take the trouble to arrange this record alphabetically. Instead, they just recorded each name chronologically, indicating which records that individual was recorded in, and on which page in the vital record. It could have been a very useful record had it been alphabetized, as originally intended.

### **Conclusion**

In Norwegian research, your most important source for vital events is the church record. The format and content of the records vary widely from place to place and from time to time. The earlier records are generally more difficult to read and understand. Church records, while they are extremely important should not be used alone when other sources are available to augment them. Other important sources are census lists, probates, and local histories. These with other less notable sources, when used together provide an excellent suite of research resources.

## BOOK REVIEWS

*[Editor's Note: Opinions expressed are those of the reviewers, not necessarily those of the editor, the Genealogical Journal, or the Utah Genealogical Association. When ordering, include postage and handling (shown in brackets) and state sales tax where applicable.]*

*Address Book for Germanic Genealogy.* Ernest Thode. 4th edition. Genealogical Publishing Co. 1001 N. Calvert St., Baltimore, MD. 21202-3897. c1991. Paper, 174 pp., outline maps, form letters [no price given].

This book in question is by all odds the most complete directory of its type. For that reason alone, it is an invaluable source for anyone interested in Germanic genealogy. It certainly belongs in the genealogy collection of every moderately sized public library.

Precisely because of its value, it follows that a book of this sort should be as accurate and as easy to use as possible. Yet the ambitious scale of the book almost guarantees that a certain number of errors will creep in.

For instance, this reviewer found the address of a Salt Lake City-based genealogical firm which has been defunct for the past seven years, as well as the name of a professional researcher who is now deceased. Possibly a letter of inquiry should be sent to all firms and individuals offering professional genealogical services inquiring as to their status prior to the next edition.

One could cite other errors of this sort, e.g., the address for the State Archive of the Canton Züerich has been Winterthurstrase 170, CH-8057 Zürich since 1984. But these are superficial blemishes, easily correctable in the next edition. A far more fundamental problem lies in the book's organization.

This reviewer has been a full-time researcher in German and German-

## *Building a Virginia Neighborhood: Laying the Foundation*

2. "Calls" are the complete metes-and-bounds descriptions required for land platting. "White oak corner with John Jones" is a *corner*. "North 37 degrees east 148 poles" is a *line*, which may also name the abutter. Novices should transcribe calls, omitting no words, to avoid losing valuable clues.
3. Occasionally classes are offered on land platting. Mary McCampbell Bell, CG, and this author are teaching a workshop at the Federation of Genealogical Societies Conference in Richmond, Virginia, in October 1994. Sessions have been offered at NGS and FGS conferences, at Samford University IGHR, and at the Genealogical Institute of Texas in past years, and probably will be offered in the future.

Two published instructions may be helpful: "Getting Started with Land Platting" by this author in the *DGS* [Dallas Genealogical Society] *Newsletter* 17:7-9 (be advised that the scale on the sample drawings was changed and is incorrect); and William T. Thorndale's Chapter 7, "Land and Tax Records" in *The Source* (Arlene Eakle and John Cerny, ed., Salt Lake City: Ancestry, 1984; (be advised that the metes-and-bounds platting instructions are not completely correct—the compass should be held vertically on the page and an inexpensive dime-store ruler should be used for accuracy).
