Volume 11
The Census of 1875

This is not a copy of a census taken at that time. If there were an enrollment made for this year it is not found in the archives of the parish, but this history will prove to be an attempt to reconstruct a census of this kind from the many records and traditions of the older people. It will therefore be incomplete in many details but will serve to revive old memories of the older generations and give a fair idea of the population here over sixty years ago. It will proceed in alphabetical order with family names ages and place of residence. We submit the following, of course, subject to correction.
